New York Stock Market

NEW YORK, August 9.—United States Steel at 781-8, Union Pacific at 205; Reading at 1651-4; Atchison at 1201-2, Great Northern Ore certificates at 861-2-here were dominating points in the day's trading which again showed new record prices for these leading favorites of the stock market speculation. The three first-named stocks absorbed an overwhelming proportion of the day's total dealings.

market speculation. The named stocks absorbed an overwhelming proportion of the day's total dealings.

The only particular influence bearing on these movements was the news that the remaining holdings in the Union Pacific treasury of Great Northern Ore certificates and of Northern Pacific and Great Northern preferred had been marketed, thus adding to the enormous free cash in the hands of the Union Pacific. The inference drawn from this was that a block of Great Northern Ore certificates that had been overhanging the market with threatening effect, having been absorbed the stock was entitled to a rise. The profit indicated to the Union Pacific was a help to that stock also. Less was heard of surmises that have been prevalent since the reduction of Union Pacific's investment holdings of stocks became known of the intended destination of the proceeds of these sales for reinvestment.

Buying of New York Central for Union Pacific account has been a favorite conjecture of the special element, but it was not heard to-day. There arose some question instead whether a policy of liquidation of investment holdings was not in force by Union Pacific. Discussion was revived also of the condition of E. H. Harriman's health.

Another influence on the early stock market, or on that portion of it including the stocks of Southern ratipoad companies, was the general rain in Texas over Saturday and Sunday. The hope of benefit to the important portion of the cotton crop grown in that State was clearly reflected in the downward plunge in the price of cotton, and stocks of railroads which have a large cotton traffic also responded.

A rise in the London price of copper failed to benefit Amalgamated Copper, but American Smelting and National Lead were among the early

A rise in the London price of copper falled to benefit Amalgamated Copper, but American Smelting and National Lead were among the early strong features. Expectation had been raised very high of the favorable showing to be made by the government crop report. This was a help to the early strength in stocks, and led up to pronounced duliness in the period of suspense before the publication of the report, a condition due to a fear that, however favorable the report might prove, sales of stocks would be pushed to realize profits when the news was published.

As a matter of fact, the report was

As a matter of fact, the report was

As a matter of fact, the report was a disappointment, especially in the condition estimate on corn. The prospects for this crop have been called very brilliant by the trade, and an improving tendency was assumed.

The sharp drop in the condition figures reported by the Agricultural Department to 84.4 on August 1, compared with 89.3 on July 1, failed to bear out these predictions. The profit-taking sales, therefore, instead of meeting an increased demand, encountered competitive selling, and prices broke sharply to below last night. Hasty short covering rallied the market, but the closing tone was irregular. The increase in the indicated yield of winter whost and the slightness of the

On Foreign Exchanges

LONDON, August 3.—Money was in stronger demand on the market to-day for payment of \$15.000,000 in treasury bills. Discounts were steady. The Bank of England secured the hulk of the \$3.000,000 in gold available.

On the Stock Exchange the mining carryover commanded the chief attention, but the tone of the market generally was good, with rises in foreign, Kaffirs and gill-edged securities under light support. Home rails were neglected and copper shares were easy.

American securities opened from 1-8 to 3-8 over parity, but later the active issues declined on realizations, and at noon the market was quiet, with prices from 1-8 to 1-4 below Saturday's New York closing. Irregularity developed, but New York bought moderately in the late trade and this caused a steady close.

close.

The July statement of the Board of Trade shows increases of \$17.237,500 in imports and \$8,907,500 in exports. The principal increases in imports were grain, flour and raw material; the increases in exports were manufactured goods.

BERLIN, August'9.—The trading on the Bourse to-day was hesitating, and the tendency was downward, owing to the uncertainty regarding the Greco-Turkish situation. , Exchange on London. 20 marks. 45 pfennings for checks. Money, 2 7-8 per cent. Private rate of discount, 2 per
